

Customer Behavior Dashboard — Executive Summary

This deck condenses a customer behavior dashboard into ten focused cards: key metrics, subscription split, category performance (revenue & sales), age-group insights, product mix, shipping preferences, and actionable takeaways. Visuals emphasize teal/brand accent on a dark #101014 theme for clarity. Data shown is taken verbatim from the supplied dashboard image and labels.

Top-Line KPIs

Number of customers

3.90K customers

Average purchase amount

\$59.76

Average review rating

3.75 / 5

Subscription Status

The dashboard shows subscription distribution: **Yes — 27%** and **No — 73%**. Most customers are not subscribed, indicating a high potential for subscription growth initiatives. This split should inform targeting and retention strategies.

Revenue by Category (Absolute)

Revenue values by product category from the dashboard (verbatim): Clothing — \$100K; Accessories — \$75K; Footwear — \$25K; Outerwear — \$10K. These figures show Clothing contributes the largest share of revenue.

RIUMNU:BT.CAGEO1Y

Ecoormerce by ANALYTICS

Sales by Category (Volume)

Sales volumes (verbatim from the dashboard): Clothing — 3M; Accessories — 2M; Footwear — 1M; Outerwear — 0M. Clothing vastly outperforms other categories in unit sales/transactions.

Revenue & Sales by Age Group

Revenue by Age Group (verbatim)

- Young Adult — 60K
- Middle-aged — 55K
- Adult — 45K
- Senior — 40K

Sales by Age Group (verbatim)

- Young Adult — 1000
- Middle-aged — 950
- Senior — 900
- Adult — 850

Young Adults drive the highest revenue and volume, followed closely by Middle-aged customers. Adult and Senior segments trail both in revenue and sales.

Product Mix Highlights

Clothing

Largest contributor by revenue (\$100K) and sales volume (3M). Core category for growth and promotion.

Accessories

Second in revenue (\$75K) and sales (2M) — strong complementary upsell potential.

Footwear

Smaller revenue (\$25K) and sales (1M); category with room for promotional lift.

Outerwear

Minimal contribution: \$10K revenue and 0M sales reported—investigate listing, inventory, or seasonality issues.

Shipping Preferences & Filters

The dashboard included shipping-type options and category filters. Shipping types listed (as checkboxes): 2-Day Shipping; Express; Free Shipping; Next Day Air; Standard. Category and demographic filters (Gender, Subscription Status) are available for segmentation and cohort analysis.

Key Observations

Concentration

Clothing dominates both revenue and sales — prioritize assortments, promotions, and inventory for this category.

Age Targeting

Young Adults produce the highest revenue and sales; tailor marketing and shipping incentives to this cohort.

Subscription Opportunity

With 73% non-subscribed customers, subscription acquisition could materially increase LTV.

Underperforming Outerwear

Outerwear shows near-zero sales despite revenue entries — review pricing, availability, or tracking anomalies.

Recommended Next Steps

1. Run a subscription acquisition campaign aimed at the 73% non-subscribers; test pricing and incentives.
2. Optimize Clothing and Accessories funnels (promotions, cross-sell, bundling) to capitalize on volume leaders.
3. Investigate Outerwear: check inventory, listings, seasonality, and tracking for sales underreporting.
4. Segment marketing by age groups with targeted creatives and shipping offers for Young Adults and Middle-aged customers.
5. Enable shipping-filtered promotions (e.g., Free Shipping threshold) and A/B test impact on conversion and AOV.

□ These actions follow directly from the dashboard metrics provided and preserve the exact figures and categories shown in the source.
